

Top-down (ODE / aggregate)

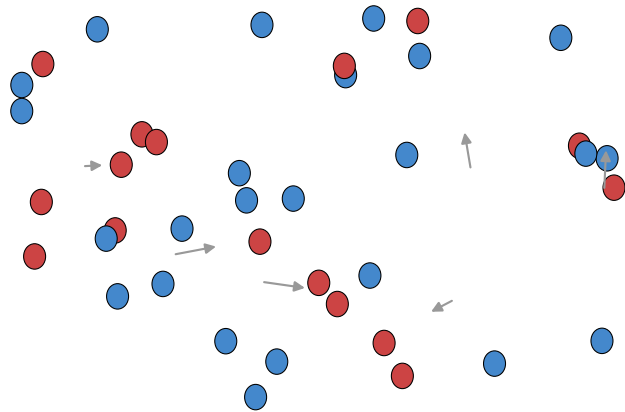

Population-level variables

$$S(t), I(t), R(t)$$

$$\dot{S} = f(S, I, R)$$
A large black rectangular box containing the text $S(t), I(t), R(t)$. An upward-pointing arrow originates from the equation $\dot{S} = f(S, I, R)$ located below the box.

Bottom-up (ABM)

Individual rules + local interaction

Emergence: clusters, segregation, flocks ...
